

Mohamed Atef Abdelhay Ghanem

GenAI Engineer • Data Scientist

Location: Cairo, Egypt • Phone: (+20) 01013424947

Military status: Exempted

Email: mohamed.atef.ghanem123@gmail.com • linkedin: [linkedin.com/in/mohamed-atef-651099193](https://www.linkedin.com/in/mohamed-atef-651099193)

GitHub: github.com/MohamedAtef321 • Kaggle: [kaggle.com/mohamedatef321](https://www.kaggle.com/mohamedatef321)

Summary

Experienced GenAI engineer and data scientist with over 2 years of experience working in data science, machine learning, deep learning, agentic generative AI, LLMs and their applications, data scraping and automation. Proven ability to drive revenue, ensure operational efficiency and work effectively within a team.

Career Experience

Data Scientist & GenAI Engineer e& Egypt (Etisalat Egypt)

Egypt

Jan 2025 - Present

- Collaborated with cross-functional teams to deliver data-driven insights and AI-driven solutions.
- Led and guided junior team members through various projects.
- Analyzed large datasets, creating reports, conducting A/B testing.
- Built Agentic AI applications, such as:
 - **Agentic AI chatbot platform** that **connects most of our internal apps and tools** in a centralized interface, with **MCPs, multi-agent workflows, ability to integrate** easily with our **internal apps**.
 - **AI app** to perform investigation analysis for **network performance** for users, this increased the performance by 5x for the technical engineers.
 - **RAG System** to let users use their own documents to get wanted knowledge with an all on-premise solution. Which increased their performance and let them use AI in a secure environment.
 - **Time series analysis** with seasonality to identify significant changes in performance of the overall network.

Top-Rated GenAI Engineer Upwork

Remote

Jul 2023 - Present

Worked with international clients on projects in many fields such as:

- **Machine Learning & AI:** Applied YOLOv5 for object detection, developed AI melody generation tools using deep learning, and built IRT models with Bayesian statistics using Stan.
- **Data Engineering:** Created a Selenium-based tool for scraping live and historical financial data from dynamic web charts and other sources, exporting it to CSV/Excel.

Freelance Data Science Coach EYouth

Egypt

Oct 2024 - May 2025

- Mentored students in AI/ML for remote freelance careers.
- Shared practical AI/data science project strategies and best practices.

GenAI Engineer Infinity Technologies

UAE

Aug 2024 - Jan 2025

- Leveraged GenAI/LLMs to build intelligent apps, solving complex problems and automating workflows.
- Designed/implemented AI solutions for insight extraction and client value.

Software Implementer Login HR System

Egypt

Nov 2023 - Jul 2024

- Deployed and maintained the application for attendance, HR, and payroll management on client systems.
- Automated data processing with SQL and created reports using SAP Crystal Reports to enhance efficiency and decision-making.

Training

Computer Vision - Summer Training
ITI (Information Technology Institute)

Egypt
Aug 2022 - Sep 2022

This internship covered advanced topics in computer vision, such as :

- Image Processing and Filters
- Python Libraries: OpenCV, NumPy, TensorFlow

Education

Faculty of Engineering - Mansoura University
Bachelor's Degree in Communications and Electronics Engineering
with Excellent grades of 85% (GPA 3.4)

Egypt
Oct 2018 – Jul 2023

Projects

Road Traffic Signs Detection (RTSD) System (ADAS) - [GitHub](#)
Graduation Project - Sponsored and Mentored by [Swift-Act](#)

Sep 2022 - Jul 2023

RTSD system uses AI and computer vision to help self-driving cars interact with traffic signs, enhancing safety and reducing accidents. I fine-tuned YOLOv8 on a traffic signs dataset and deployed it on a Raspberry Pi board. The system works with an autonomous RC car.

Also, we added some additional features to the project. The ones which I was responsible for are :

- **Night Vision:** Enhances vision accuracy in dark environments.
- **Lane-Line Detection:** Helps the self-driving car detect lane lines.

Skills

General :

- **Programming & Software Development:** Proficient in various programming concepts, including OOP, synchronous/asynchronous programming, SOLID principles, Assembly, software engineering, and back-end/Android app development.
- **Data & Systems:** Experienced in data scraping, automation, database management (SQL Server, Power BI, SAP Crystal Report), Linux administration, cybersecurity, and networking (2G, 3G, 4G technologies).
- **Version Control & Cloud Platforms:** Familiar with Git/GitHub/GitLab and cloud platforms such as AWS, Digital Ocean, and Heroku.

Technical :

- **Programming Languages & Libraries:** Python (with various libraries), Java, C/C++, SQL, HTML, CSS, JavaScript, PyTorch
- **AI & Data Science:** Machine Learning & Deep Learning Algorithms, Computer Vision techniques, NLP & Hugging Face, LLM, MCP, Agentic AI, Agno, Langgraph, DsPy, Airflow, MLFlow, n8n, UIPath, Langfuse

Certifications

- AWS Certified Cloud Practitioner - [Cert-Link](#)
- Machine Learning Specialization (Coursera) - [Cert-Link](#)
- Database Fundamentals & Applied Machine Learning (Mahara-Tech) - [Cert-Link](#)

Courses

- Deep Learning Specialization (YouTube) - [Link](#)
- Data Analysis & Visualization Courses (DataCamp)
- Python for Data Science and Machine Learning Bootcamp (Udemy) - [Link](#)

Languages

- Arabic (Native)
- English (Fluent)
- French (Beginner)
- German (Beginner)
